Popular Teacher Gets New Appointment

Miss K. Collins, who for some years has been primary teacher at the Didsbury School, has resigned her position here and has taken an appointment as teacher director at Prince George, B.C. She expects to leave this week.

Miss Collins has done splendid work here in the primary department, not only teaching the regular curriculum, but introduced many original methods of her own. She was greatly loved by all her small pupils.

She also undertook the musical education of the school and the development of many groups of young singers, who not only delighted the local public with their artistry but also won many awards at musical festivals, is very much to her credit.

Outside her school duties she was also willing to help in almost any capacity. She organized many concerts and almost every organization in town took advantage of her musical abilities.

While here she was a great asset to the community, and all are sorry to see her go, but wish her every success in her new position.

Among the latest draft of members of the Canadian Women's Army Corps to leave Calgary for Kitchener, Ont., where she will take a basic training course, was Jean McDonald, daughter of Mr. and Mrs. John Robert McDonald, of Didsbury.

Dairy Calf Club Show

The Didsbury Dairy Calf Club held its annual exhibition at the Agriculture Fair. Sixteen boys and girls showed dairy calves which they had fed and groomed for the show. Holsteins were favorites with the boys and girls, there being 10 Holstein calves, 4 Ayrshires and 2 Jerseys shown.

The local citizens had contributed \$150 in prize money; the first six awards received special prizes and each of the others showing calves received \$2.00.

The calves will be raised by the junior club members and shown again as yearlings and two year olds, when they become valuable dairy cows.

W. A. Hoosford, of Edmonton, placed the calves as follows:

Jeanette Womell, 1; Alice Bruce, 2; Edward Irwin, 3; Marjorie Clarke, 4; Marjorie Bruce, 5; Margaret Atkinson, 6.

Alice Bruce won the prize for best showmanship of her calf while in the judging ring.

A judging competition was arranged for dairy club members, judging holstein cows that were shown at the fair. W. Mead, of the Olds Livestock staff, placed the marks, which were decided also on the terms judging of each boy and girl as well. Prizes went to the following:

Marjorie Bruce, 1; John Parker, 2; Marjorie Clarke, 3; Dorn Gillie, 4; Alice Bruce, 5; Ken Morris and Cleone Webb tied in 6; Donald Stiles and Jimmie Clarke tied in 7.

—Marjorie K. Stiles

Nominating Convention

Nominating Convention of Bow River Progressive Conservative Association will be held in the Skating Rink Hall, Irricana, at 2 p.m. Friday, August 11th, 1944, to choose a candidate to support Mr. John Bracken in the Federal House. All supporters of Mr. Bracken, irrespective of party, are heartily welcome. Mr. Bracken will be present and deliver an address. The election of officers for the ensuing year will also take place at this meeting.

Didsbury Dairy Stock Wins High Honors

F. W. Leeson and son made a very good showing with their Holstein entries at the Calgary exhibition.

Their mature bull, "Westland Hayden Monarch", was awarded first prize, senior and grand championship. This is the third year in succession that that bull has been awarded champion honors at the Calgary exhibition, and he is undefeated in the West.

"Westland De K. I. Duchess" took first prize as a junior yearling, and was awarded the reserve senior championship.

These cattle are now being shown on the Western Fair Circuit, and are headed for prominent dairy shows in the U.S.

Weddings

STERLING-TIGHE

A wedding of local interest took place July 1 when Miss Bernice Lena, second daughter of Mr. and Mrs. Harold Tighe, of Chilliwack B.C., and formerly of Didsbury, became the bride of L. S. N. V. Sterling, youngest son of Mr. and Mrs. R. M. Sterling, of Castairs, Alberta. Rev. Redman performed the ceremony.

The bride wore a floor-length gown of powder blue sheer, and carried a bouquet of tallman roses and baby's breath. Her only ornaments were a string of pearls and a Birk's wrist watch, gift of the groom.

The bride's attendants were Miss Margaret Henningreich, of Victoria, B.C., as bridesmaid, was attired in a floor-length gown of turquoise blue sheer, and carried a bouquet of pink and white carnations and baby's breath; and Mrs. Tighe, sister of the bride, wore mink sheer and a shoulder corsage of mink, sweet peas and baby's breath, who was flower girl.

The mother of the bride wore a dusty rose two-piece suit with rose accessories, and a corsage of pink and white sweet peas and baby's breath.

A. B. Simm, George Edmondson, of the R.C.N.V.R., at Halifax, assisted the groom.

Following the ceremony, a buffet luncheon was served at the home of the bride. Mrs. H. Cappach of Castor, and Mrs. G. Weber of Castairs, both sisters of the groom, assisted.

Later, Mr. and Mrs. Sterling left for Bridal Falls, B.C., and Calgary, Alberta, for their honeymoon.

The bride will return to her home in Chilliwack, and the groom to his station at Halifax.

A Calgary visitor was here this week and went shopping for a house dress. She said there were more to pick from and the price was less.

Mr. and Mrs. Idris Jenkins and small daughter, who have spent their holidays with relatives here, will return to their home at Whitehorse this week.

Expect To See A Shortage Of World Foodstuffs For Two Years Following End Of War

(From The Financial Post) **A**LREADY many people are starting to count the eggs in Canada's post-war agricultural basket. One thing they discover is that the first year or two after a European armistice is not going to be very much different from the war years—so far as short supplies and urgency of demand is concerned.

They find also that there is going to be a strong dispute among farmers and other primary producers, to overlook the traditional yardsticks of "cash-on-the-barrelhead" and continue supplying bacon or cheese or wheat to Britain or elsewhere, so long as the demand is there, and irrespective of old-time fiscal considerations. We did it in the war, it will be argued. We must keep on doing it.

Finally, they find underlying the whole post-war picture a new, significant approach towards nutrition and food values. It seems unlikely that we will ever go back to haphazard standards of letting people subsist on what their individual budgets and on what the over "national" budget can afford. It seems almost certain that national standards will emerge from this war as minimum obligations below which none of the progressive, well-developed nations of the world will permit food supplies to fall.

All of these considerations have far-reaching implications so far as Canada and Canadian agriculture are concerned.

During the war, production of Canadian agriculture has risen by 40%. This despite a 23% cut in manpower and restricted supplies of machinery and equipment. At the same time, Britain has by colossal agricultural effort been able to produce 70% of her requirements instead of about 45% before the war.

The first immediate post-war task will be the relief and rehabilitation of impoverished nations. Thus in Britain and elsewhere the present disposition is to believe that the two years immediately following the close of the European war will find shortages of world foodstuffs as acute, if not in some cases more acute, than those prevailing during the past four years. In Canada and Britain agricultural planning is proceeding more or less on the assumption that wartime conditions will continue through 1945, 1946 and possibly 1947. The attempt to negotiate a four year bacon contract with Britain is in line with this point of view.

Canadian authorities believe Britain will never again permit as great an unbalance between agriculture and industry as in the past; that she will in future be less dependent than heretofore on food imports. But if she can raise her nutritional standards as she hopes to do, the volume of our exports to UK may not diminish greatly if at all. Flour export is expected to diminish to the benefit of more wheat, because of the need in Britain, after the war, to increase her supply of roughage and other valuable parts of the wheat kernel.

They are also prepared nations of the world to game to pay for our agricultural produce? How is Britain going to maintain her food imports in view of her wartime loss of overseas investments and services?

It seems almost certain that for a year or two after the war, Canada will be required to make up any deficit in her overseas accounts by something equivalent to her present Mutual Aid. Recent discussions in Parliament reveal a large number of members putting themselves firmly on record as believing that Canada should carry over into the peace, the same principles of "mutual aid" that have characterized the Canadian war effort.

MUCH SIMPLER

The soldiers were being drilled in the village square, watched by a little group of the residents.

"Company! Two paces forward—march!" bawled out the sergeant-major.

"Now, isn't that just like them chaps?" said an old lad among the spectators. "Why couldn't he take two paces forward himself instead of moving the whole regiment?"

Must Do Without

More White Shoes For Civilians Until After War

There are probably 20 babies in Toronto for every pair of white baby shoes available—but it won't be long now before more of the tiny boots can be bought, according to Toronto dealers. Nurses and interne who have found it hard to obtain white shoes in recent months will also find it easier shortly. However, "civilians" white shoes are out for the duration and when stores have exhausted their present stock, there just won't be any more.

Because white shoes are regarded as unnecessary for civilians use, their manufacture has been discontinued. Labor and material shortages in shoe factories has reduced production of the infant type to a minimum and production has stopped up.

A casual glance at a few Dominion Bureau of Statistics figures on production of leather footwear tell the story of increased demand for shoes.

WORKING IN MINES

Twenty thousand British prisoners, many of them miners, are working in German coal mines. Major Henderson, Financial Secretary to the War Office, told the House of Commons recently. Their conditions are by no means uniformly satisfactory and protests have been made through the protecting power.

Prefers His Jeep

Canadian Adjutant Thinks It Safer Than German Officer's Horse

Ross Munro, Canadian Press war correspondent, tells this story about Capt. Dave Brennan of Ottawa, adjutant at R.C.A.S.C. headquarters in France, who is going to stick to his trusty jeep for transportation future and refrain from riding captured German officers' horses.

On D-Day, when there wasn't much transportation at the beachhead, Brennan commanded a German officer's horse, a splendid animal complete with saddle and bridle. He mounted and went about his beachhead business of keeping ammunition rolling forward. But on a road his steed shied at a tank and leaped a fence with Brennan still in the saddle.

Over the fence was a German minefield.

He jockeyed his horse cautiously back to the road without exploding any mines, tied it to a point and went his way on foot.

The good thing about a jeep, says Brennan, is that it won't jump fences.

Radio Stove Predicted

Would Pick Up Heat By Resistance To Wave Length

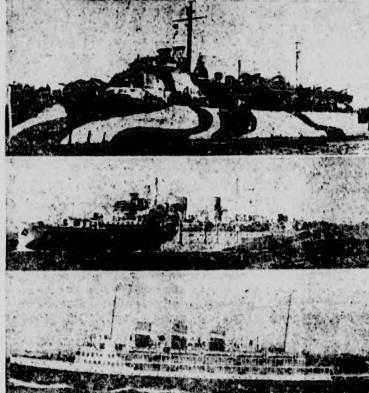

After the war you may be able to tune in a stove by turning a radio dial.

This prediction was made at Columbia University in connection with an announcement of a new centre there for industrial research in high frequency electricity.

A tuned-dial stove would be an alloy of some sort that would pick up radio waves of short lengths, the same general type of radio waves now used in industry to heat plywood and resins.

The radio stove would pick up the heat by its resistance to a specially chosen wave length. The problem is to find an inexpensive wave length which would not heat anything except home stoves.

Famous Sister Ships In Invasion Fleet

Photos show the PRINCE DAVID (top), the PRINCE ROBERT (center), and the PRINCE HENRY (bottom) photographed before her conversion for war service

Three Canadian ships in the armada carrying Allied troops to breach Hitler's Atlantic wall were originally designed for holiday traffic with no thought of grim business on the Normandy Coast. The Prince Henry, Prince David and Prince Robert were built for the Canadian National Steamships at Birkenhead, England. In the Pacific Coast service and in Atlantic waters each of these three sister ships covered great distances and carried many holiday travellers until 1939 when taken over by the Royal Canadian Navy. The H.M.C.S. Prince Robert became an anti-aircraft cruiser while the other two were redesigned as combined operations cruisers.

Press despatches from the front reported that the Prince Henry was one of the first ships to land troops in France while the Prince David also launched her landing craft in the early stages of the attack, and the Prince Robert was an important unit of the protective fleet.

While Canadian National Steamships officers had no thought of war

when specifying the type of ship required, they did ask for power and speed and thus, unknowingly, provided the basis for useful cruisers. The boilers installed high pressure boilers driving steam turbines to develop 16,000 horsepower and a top speed of 23 knots. The purpose was to maintain a long escort schedule.

The Prince ships were designed for 334 first cabin passengers with deck space for 1,500 day passengers. When launched these ships were each of 6,000 tons. In war dress their top decks, which carried much of the cabin accommodation, were dismantled.

H.M.C.S. Prince Robert has been more frequently in the news than her Canadian National sisters, early capturing a rich prize in the Pacific, and afterwards staging a fierce battle against enemy aircraft while guarding a convoy in the Atlantic.

These ships sailed to the Land of the Midnight Sun but no Alaskan adventure imagined by Jack London, Robert Service or Rex Beach approached that recent action off the Coast of Normandy.

Soil Conservation Is One Of Most Important Problems In National Existence Of Canada

At the recent conference of the Ontario Agricultural Representatives held in Toronto, on soil conservation Dr. E. S. Archibald, Director, Dominion Experimental Farms Service, observed that there were many interpretations as to the meaning of that subject, one of the most popular being that soil conservation embraced all factors regarding good soil management for crop production. Actually, he declared, the subject was much broader than that.

Controlling Mosquitoes

Mosquito Is Found To Be Effective As a Repellent

A large number of repellent materials have been tested in the field during the past few years by the Division of Entomology and Plant Inspection, Dominion Department of Agriculture, in co-operation with British and United States investigators developing materials for military use. The most outstanding of the repellents tested is one known by the code name of Rutgers 612, which was developed as a result of research carried out under a Fellowship at Rutgers University. Two other excellent chemicals are dimethyl phthalate and Indalone. These three materials are being used alone and in various compounds both liquids and creams by the British and United States armed forces, to obtain a measure of protection against blood sucking and disease-bearing insects especially in tropical and sub-tropical regions. The demand for these materials in this connection is so great that little or none is at present available for civilian use.

A formula that found favour, especially among forest workers before the war, involved the use of pyrethrum extract. Unfortunately, the available supply of pyrethrum is all required for military purposes as it is an essential ingredient in the manufacture of sprays and aerosols in controlling mosquitoes and similar insects which affect the armed forces on active service.

In view of these facts, it is necessary for civilians to make do with less effective but better known repellent mixtures of the pre-war variety. Tests carried out by the Dominion Division of Entomology showed that one of the best of these for protection against mosquitoes and black flies has the following formula:

Oil of citronella 3 oz.
Spirits of Camphor 1 oz.
Oil of tar 1 oz.
Castor oil or peanut oil 4 oz.

This mixture was found to be equally effective as the one containing pyrethrum extract. To obtain the best results it is necessary to completely cover all exposed parts of the body.

Out Of Fashion

Wearing Of Beards In The Navy Going Out Of Use

Beards, once so popular, fed with Canadian sailors, are growing scarce and the Navy is just as glad.

A recent memorandum in this command asked seagoing captains to discourage the wearing of beards. The order stemmed from a post-mortem on the sinking of H.M.C.S. Valleyfield, which disclosed that at least two of the victims might have had a better chance of survival had they not been wearing beards. Oil and salt water mixed in with their whiskers choked them.

Another consideration has been that, in a last gamble, the enemy might resort to gas, and the Navy points out that it's difficult enough to breathe in a respirator without the stifling effects of a beard.

TONS OF SALVAGE

During April more than 10,767.732 pounds of salvage were collected in Canada from voluntary salvage committees alone. Through other channels 197,618 tons of scrap iron and steel and thousands of tons of essential war materials were collected and disposed of.

A British bombsite has 4,200 tiny parts, some fitted with tolerances as low as .0008 of an inch thick.

The underlying causes of soil deterioration necessitating a conservation program must first be cured. These causes were essentially the economics of farming in relationship to other ways of life.

To restore proper conditions on the vast areas of good land was a much greater problem in the soil conservation program than the correction of soil erosion, curbing flood misuses, or even reforestation of sub-marginal lands. A soils conservation program, said Dr. Archibald, must be treated comprehensively, with no undue stress on any one item. The least obvious of losses necessitating a program were the worst enemies, for example the loss of soil fertility, loss of proper soil tilth and organic life, and the gradual but more serious enemy in erosion, namely sheet erosion. In all programs of soil restoration and maintenance, grasses offered the greatest aid. Too great emphasis could not be placed on grassland improvement, greater use of grasses and legumes in rotations, and the use of grasses to prevent erosion permanently.

Reforestation had a big place in erosion control, but the farm woodlot had also a very necessary part in farm economy. In Ontario this part of the average farm had been more neglected than any other part of the farmer's holding. With regard to fertility levels they were by no means simple and were so interwoven with the organic life of the soil that the problem could not be dismissed lightly by merely advocating the use of commercial fertilizers. Also a knowledge of soil type in relationship to deterioration, retention of productivity or soil improvement was fundamental to a soil conservation program.

The utmost in co-operation by the government departments, where government aid to farmers or educational leadership among farmers, was needed, and on the other hand co-operative activities among the farmers themselves was the secret to any success in soil conservation, which was one of the most important problems in the national existence of Canada.

Done In Straw Yarn

7112
by Alice Brooks

Crocheted accessories are a must in today's wardrobe. This hat and matching purse (at costs next to nothing) are crocheted in no time.

A crocheted hat or bag is the mark of a well-dressed woman. Pattern 7112 contains directions for hat and purse; stitche.

To obtain this pattern send twenty cents in coin postage to the Acceptance Department, Winnipeg, Manitoba, 175 McDermott Avenue, E. Winnipeg, Manitoba. Be sure to state plainly your name, address and pattern number. Because of the slowness of the mail delivery of our patterns may take a few days longer than usual.

An Editorial

Voting for or Against?

Excerpts from Edmonton Bulletin

The confusion existing in some voters' minds, with three major political parties campaigning for votes on August 8, can be settled by looking at the record.

With all kindness to the many excellent candidates running for all parties the issue in this 1944 election is whether the Manning government is to be returned to office or defeated.

Premier Ernest Manning is young, able, honest and efficient. In fact his handling of Alberta affairs is the envy of every other province in Canada. Alberta has the most advanced social legislation—free cancer treatment, free T.B. treatment, free V.D. treatment and free hospitalization for all maternity cases. No other province provides such health services.

Alberta's school system is far in advance of every other province and is being further advanced year by year.

Alberta labor laws, minimum wage laws, workmen's compensation, etc., and what is vital, the enforcement of these laws for the benefit of employees is without equal in Canada.

Alberta pays the highest old age pensions under the rules and regulations of the Dominion Government. The Alberta government has requested the Dominion government to raise pensions to \$50 per month and lower the age limit to 69 years, and do away with all unfair regulations.

Aid and protection to the farmers, to the limit of provincial powers, is unequalled by any other government in Canada.

Premier Ernest Manning has more progressive legislation to his credit than any other government in Canada. He pledged to carry on the fight for monetary reform, and is the only one in the country who submitted a brief to Ottawa on how to finance the vast changes necessary in post-war reconstruction. That brief was so timely and to the point that not one word of criticism has been heard against it.

THINK and then VOTE, August 8.

WHEN CANADA WAS FACED WITH WAR

EXTRACTS FROM THE OFFICIAL HANSARD REPORT OF THE SPECIAL WAR SESSION OF PARLIAMENT IN SEPTEMBER, 1939

The Social Credit Stand!

"... New Democracy aims to put at the service of the people the whole resources of Canada, whether that people be at peace or at war. It aims to achieve national security, whether we be at peace or at war. It aims to modernize and make efficient the instruments of production and distribution. New Democracy realizes that inefficient democracy means dictatorship. That is the danger which Canada faces today. In its way it is a danger as great as is the danger of defeat in war."

"Therefore, we urge the adoption of a law of national service so that all our resources of finance, industry and manpower may be put at the service of our country, so that there may be equality of service and of sacrifice..."

JOHN BLACKMORE, Hansard, September 8, 1939

"... We have declared for equality of service and sacrifice, which means conscription of finance, industry and manpower. We as a party stand united for national service for complete efficiency. Everything must be organized and directed toward the quick and unquestionable defeat of the dictator of Europe. Pacifism will not defeat Nazism. Britons never will be slaves. That is why we demand the defeat of Hitler."

"He was not satisfied with the enslavement of his own people and the destruction of democracy in his own country. He embarked upon a war of aggression to destroy democracy in the other free nations of the world. He has challenged the British Empire, and that is why we have urged upon the government the necessity of universal conscription of finance, industry and manpower. This alone will ensure equality of service and sacrifice, which in turn ensures the maximum effectiveness of Canada."

J. C. LANDERYOU, Hansard, September 9, 1939.

"The New Democracy group has laid down the principle in Canada and in this House that when Canada is at war the whole of Canada is at war. You cannot conscript men and have industry and finance volunteer. You cannot conscript finance and industry and have men volunteer. This is a sound principle; it is an elementary principle of good business which it would seem imperative for this Parliament to accept. If we choose not to do so now, circumstances will eventually compel us to do so. I sound this solemn note of warning to the Government; that we cannot afford not to begin right. The experience of the last war, if it taught us anything, taught us that..."

A. H. MITCHELL, Hansard, September 11, 1939.

The C.C.F. Stand!

"... the Co-operative Commonwealth Federation believes that Canada's policy should be based first on the fundamental national interest of the Canadian people, as well as on their interest in the outcome of war. Canada should be prepared to defend her own shores, but her assistance overseas should be limited to economic aid and must not include conscription of manpower or the sending of any expeditionary force."

"2. DEFENCE OF CANADA: Reasonable provision should be made for the defence of Canadian shores. Volunteers for home defence should not be required to sign also for overseas service. This practice, now being followed, is unwarranted and should be abandoned."

"3. NO MILITARY PARTICIPATION OVERSEAS: Any attempt to send a force abroad would rob us of the manpower necessary for the defence of our shores and for home production, would gravely endanger national unity, would threaten our civil liberties and democratic institutions, and would ultimately lead to conscription."

OFFICIAL STATEMENT OF POLICY, Presented to Parliament by M. J. Coldwell—Hansard, Sept 9th, 1939.

"The Co-operative Commonwealth Federation is opposed to military action overseas."

C. GRANT MacNEIL, House of Commons, September 11th, 1939.

"Canadians can do more to maintain freedom and democracy by being alive in Canada, than six feet underground in European soil."

HAROLD WINCH, C.C.F. Leader in B.C. Legislature—Speech at Vancouver, Sept 29th, 1939.

"We did not approve the sending of an expeditionary force overseas."

M. J. COLDWELL, House of Commons, May 20th, 1940 (One month before the fall of France)

"I am not sure that anything has been gained so far... because of the men Canada sent out of the country, . . . the men could have been used to much better advantage at home."

ANGUS MacINNIS, House of Commons, February 26, 1942

**CULL OUT POOR
LITTLE CHICKS**

This is no time to keep
hoppers, cull out the little
poor chicks often.

We find that it is com-
mon for the mothers of
small flocks, to cull the
hoppers just about once
a week.

With the pullets are go-
ing into the laying house.

After the pullets are go-
ing into the laying house,

we have proven that

it is far more satisfactory

to cull out the hoppers

period of the year—be-
cause when the pullets

are grown, her eat val-
uable feed.

If she doesn't

produce well, she becomes

a money loss for you.

Instead of a source of big

problems, you can now

market her for feed.

Better Farmers

Just over a year ago, we drew the attention of the best young agricultural colleges offered to farm boys and young men in the three Prairie Provinces. We emphasized the wide variety of skills that are essential to successful farming, and pointed out that while many of these can be acquired through farm experience, others are developed much better and more quickly through special training at agricultural colleges and schools. If any reader doubts this statement, let him consult a graduate of the School of Agriculture, Orléans, Alberta, or one of the farm schools connected with the Universities of Saskatchewan or Manitoba.

It is significant that discussions of post-war agriculture, by government departments without exception, emphasize the necessity of increasing the facilities for training prospective farmers. Many farm organizations have expressed similar views.

The young man who decides to devote his life to scientific research, teaching or extension must take a university degree. That usually involves Grade XI or Grade XII entrance requirement and four university terms, extending from the end of September to the latter part of April. For young men, many farm boys will never consider enrolling in the degree course and, consequently, shorter, more practical courses are open to any farm boy 16 years or over in each of the Prairie Provinces. These shorter courses extend over two terms of about five months each.

Enquiries should be directed as follows:

Dean of Agriculture and Home Economics, University of Manitoba, Winnipeg, Manitoba.
Dean of Agriculture, University of Saskatchewan, Saskatoon, Saskatchewan.
Dean of Agriculture, University of Alberta, Edmonton, Alberta.
Principal, School of Agriculture, Olds, Alberta.

Democracy in Business

The co-operative movement is democracy in business. As it depends on human agencies to conduct it, it can never be perfect, but it is a long way ahead of the capital stock company and the modern trust corporation.

Co-operation does not exist in law or in formula. It exists in the minds and hearts and purposes of the people. It is founded on mutual confidence and trust. With the development of these ideals, people can make a success of co-operation.

The Alberta Wheat Pool is a creation of the farmers of this province. It has demonstrated its efficiency as a business organization and also its adherence to the co-operative principles. To make it a greater success than ever, it needs the interest and support of a greater number of the farm people of this province.

**PATRONIZE
ALBERTA POOL ELEVATORS**

Look Over The Slates!

Look at the Social Credit, the C.C.F. and the Independent candidates. Look at them critically.

Ask yourself who among these men are competent to handle the farmers' post war problems—with the specialized, practical knowledge required.

The INDEPENDENTS—and the Independents only—have farmers as their candidates in most constituency.

VOTE INDEPENDENT

Inserted by the Independent Citizens' Association of Alberta

One look in your mirror will give you the answer . . . Am I man or mouse . . . am I one of those who lets the other fellow face all the danger, take all the risks? Look yourself straight in the eye and ask yourself this one question . . . Have I the guts? The guts to wear the G.S. badge on my sleeve—to fight that my home, my people may be free.

You'll need months of thorough training to make you fighting-fit. Your place is beside every man who has the courage to see it through. Canada's Army needs you NOW, and needs you for overseas service.

WORLD HAPPENINGS
BRIEFLY TOLD

Mr. Churchill is to consider the possibilities of the pitless plane as a mail carrying project after the war.

A necklace of 64 diamonds realized \$3,800 at a benefit sale in London for the Mission to Deep Sea Fishermen.

Doncaster, England, recently celebrated the 750th anniversary of the granting of its first charter by Richard I in 1194.

More than 4,500 members of the Swedish armed forces have been dismissed since the war began while serving on neutrality defence.

The King has approved the inclusion in the arms of Malta of a representation of the George Cross, in order to perpetuate the award of the cross to the colony.

Fourteen factories have been in operation in Britain for dehydrating during the past year, and an entirely new product—"mashed potato powder"—has been developed.

A Soviet purchasing commission has been to Holland to negotiate for more than \$2,000,000 worth of equipment for Russian film production.

African villagers of the Kawamawa district have collected nearly 9,000 pounds of rubber for the war effort in 15 months. The scheme is organized by the local chiefs.

In the first six months of a new British ministry of war transport course for sea cadets wishing to enter the merchant navy, all the 732 entrants passed the final examination, 619 securing first-class passes.

MORE SPENT ON ANIMAL THAN
ON HUMAN HEALTH

"It is people who count in this world, not material things," Dr. J. J. McCann (Lib. Renfrew South), said in the Canadian House of Commons during discussion of a Government bill for the creation of a department of national health and social welfare.

"I was glad to hear the Prime Minister say today that more attention will be given to the health of the people of Canada and that it was a matter of some concern to the Government," Doctor McCann said.

"If we look at the record we find that the Department of Agriculture has spent many times more money on the health of animals under the Health of Animals Branch, than has been spent by this government on the health of the people. That is because due importance has not been given to the value of people as an asset to this country."

Doctor McCann hoped that there would be an improved spirit of co-operation between the national and provincial health departments as the health problems of the people could only be solved by the closest co-operation and co-operation.

The member mentioned that in 1942, there were in Canada 6,600 tuberculars, diphtheria and about 250 from diphtheria. He said he pointed to these facts to stress the need for preventive medicine. Preventive effort could be carried out only if the federal government gave leadership, guidance and financial assistance to the provincial departments and the health education agencies.

LESS CRIME

Crime in London, since the beginning of the invasion, has reached a new low level. Not one major crime, and only a few small cases have been reported in the Metropolitan Police District during the first sixteen days after June 6. It is interesting to note that important war news has been consistently followed by a big drop in crime, particularly in the Metropolitan area.

Muscovy was a former name for Russia.

Doing A Man's Job

Has The Expert Touch That Means
The Saving Of Lives

Twenty-eight year old Marjory E. Sutton of Canadian Airways Ltd. in Winnipeg is one girl doing a man's job—and really likes it.

Marj. handles the magnafux machine. In other words, she is the secker out of faults and flaws in all the steel parts that make up aircraft engines handled at the plant. Life and death may rest on her decision.

For more than two years—ever since she gave up her job in a large departmental store as a clerk, Marj. has been inspecting every steel part of several motors a day—sometimes more.

When she passes a piece of equipment that is faulty, then chances are it will give way under stress during the plane's flight. The result could mean the death of one or more of Canada's fliers.

But Marj. has the expert touch. Her length of duty at the job proves that.

Marj. comes from a family which is doing more than its share in the war effort. Her three brothers are in the services. Len, who was with the R.C.A.F. in Sicily, recently returned to Canada. Bob is still overseas with the artillery, and Jack is with the R.C.A.F. at No. 1 Central Navigation School at Rivers, Man.

Marjory likes her work much more than clerking.

"I guess it's because I don't like dressing up all the time," she said with a grin, and wiped her oil-stained fingers on her overalls. "Besides, doing this work, you really feel as though you're accomplishing something."

No Passports

Restrictions On Travel To United
States Have Been Relaxed

Canada and United States jointly announced new relaxation of restrictions on travel across the border.

"Hereafter," the announcement said, "no 'passport, visa or border-crossing card will be necessary for entry into the United States" by Canadians or British subjects who come into this country for 29 days or less on either business or pleasure, captain stepped out.

They were met by two German officers who had a party of soldiers well to their rear. The enemy officers saluted stiffly.

One said in English, "It's a very hot day, isn't it?"

"Yes, it is," Captain Roosevelt answered.

And then the German nurses climbed from the ambulance and walked down the road to the German lines. The German officers saluted formally, wheeled and walked away.

A few minutes later the guns began booming again.

Even if the earth did not rotate at all on its own axis the sun would rise and set once during the year because of the earth's journey around it.

LIFE'S LIKE THAT

"My wife doesn't pester me for money. . . . The people she buys things from do that."

REG'LAR FELLERS—One-Man Army

WANTED TO HELP

At the outbreak of war, the indigenous natives of Ocean Island, the Banabans, sent a cable saying they were placing \$10,000 (\$44,000) at the disposal of the government as a contribution to the war funds.

OUR COMPLETE
SHORT STORY—
Priority Item
—By—
BERNICE MINARIK

McClure Newspaper Syndicate

Still wishing he could cancel his role in the night's proceedings, Dave limped toward the hotel bar. It was ten now but Karen, like any other woman, would undoubtedly be late.

He seated himself on a red leather stool and faced a florist's mauve box on the polished counter. The bartender seemed intent on removing seeds from halved limes.

"Are you married, Mike?"

"Barely married twenty years." Mike looked up at his customer, seeing a face full of weary, expectant readers, a sober oilfish face, the brown eyes serious behind horn rimmed glasses, the high forehead permanently creased, the cleft chin thrust forward. This countenance, topped by crisp straw colored hair, belonged to David Prescott, European war correspondent, home for a breathing spell after writing "I Saw It Happen". The bartender didn't recognize him. He said simply, "What'll you have?"

"Mike, I'm allergic to weddings and I'm slated to appear at one. What do you prescribe?"

"A bridegroom, eh?" The dour expression almost cracked into a smile. "You'd better try my special a Blood Transfusion."

"Make it two. But you got me wrong. I'm only the best man." Kyle Benson was the groom. With a weekend's leave from his Army camp, he was coming to town on the midnight train.

Dave felt in his breast pocket to make sure the wedding ring was still safe. It was, with the telegram carrying his new Amalgamated Press assignment. He'd be glad to get back in harness. Danger he

could take in his stride—a lame one now, he reflected wryly—but deliver him in the future from appearing at publishers' teas, from lecturing at women's clubs and, above all, from playing nursemaid to another guy's romance!

When Karen arrived, Dave was holding a Blood Transfusion in each hand and alternately sipping them. "David?"

He ignored her.

"David Prescott! I have to talk to you."

"What's the rush? Open Lyle's flowers."

She fumbled with the box and seemed hesitant as she pinned the corsage of three white gardenias to her jacket lapel. "If you're ready now," she urged, "let's go out into the garden."

A full moon hung in the sky like a misplaced alarm lamp. They sat down on a marble bench. Neither spoke. Dave surprised himself by thinking how really beautiful the girl was: tiny, blonde and exquisite. She broke the silence. "David, I've done something awful."

"You've torn up the marriage license?"

"Accidentally?"

"No!" He detected defiance in the tone of her voice.

"Did you save the pieces?"

"Yes." She pulled an envelope out of her purse and handed it to him. "But why?"

"Frequently a bride has diving board jitters."

From his pocket he took a spool of Scotch tape, the stuff he used for holding news copy together, and proceeded to patch up the scraps. "In case you change your mind," he told her. "I've made a date with a bomb for half past midnight. I shouldn't want to disappoint him."

He lighted a cigarette, then asked: "You and Lyle have never met each other a long time, haven't you?"

"Yes, but perhaps we're not the right ones for each other."

"Nuts!"

"I want a real marriage—a home children. Yet Lyle gave up a good position to volunteer for Army service."

"He's an engineer. The Government's begging for guys like him. You knew that two months ago when you and he applied for the license."

"I didn't suppose then there could ever be anybody else in the world for me but this past week—she hesitated.

"Yes?"

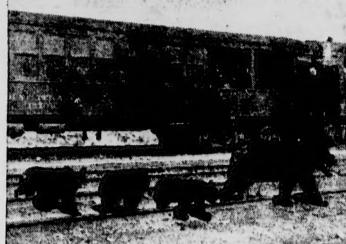

"I've discovered you."

"What the heck?" he bellowed. "Talking to me as if I were—or—Gable—or Casanova! But maybe I've been underestimating myself."

He drew her into his arms and found his heart suddenly missing beats. She closed her eyes. Was she his for the asking? He thought

much of the time.

Professional Beggars

"Four of a Kind" in Jasper National Park, Alberta, Canada.

During the summer of 1943 a black bear in Jasper National Park, Alta., had four cubs, three brown and one black. Such an unusual occurrence created quite an attraction, not only for visitors but also for the residents of Jasper. As soon as the cubs were big enough to come to town the mother bear proudly paraded them through the streets and down to the railway station where travellers passing through Jasper could also see them. The cubs quickly became accustomed to humans who fed them countless chocolate bars, biscuits, and other tidbits. Hundreds of feet of film were exposed showing the public feeding and petting the cubs and sometimes children rolling on the grass with them.

This summer these cute little "clowns of the forest" will have grown to good-sized and powerful bears. They will have become professional beggars preferring the easy way of getting their food to the natural way of hunting for it in the forest. If sufficient food to their liking is not forthcoming when they require it, they will take it anyway. They will raid kitchen larders, iceboxes, cars, tents and garbage cans. Complaints will be numerous and eventually the park warden will be asked to shoot these "cute little cubs" of 1944.

That is why visitors to the national parks are being urged to refrain from feeding or petting the bears. It is dangerous for the visitors and is usually fatal to the bears.

Between the wars she was reconditioned, and she emerged one of the most powerful and up-to-date battle ships—Transatlantic Daily Mail.

Canada's Standard Smoke

Had To Have A Paper Obstacles To Progress

Radio Can Never Become A Substitute For a Newspaper

People who talk loosely about radio and television, etc., etc., being likely to displace newspapers should read a despatch that came from Cherbourg, This:

"The first newspaper to be printed in liberated France rolled off the presses yesterday and news-hungry Frenchmen flocked in the street outside the building, retired printing plant for the first time."

These Cherbourg Frenchmen were well supplied with radios. The BBC, the Vichy radio. That didn't satisfy them. They could listen to all the war communiques and to all the "commentators", but still they were hungry for a newspaper; something in print they could read and study something which heard for a moment, could not be checked or thought about because it vanished from memory.

And that precisely is why radio can never be a substitute for the newspaper: the spoken word substituted for the printed. The radio is too ephemeral, too impersonal; too much of the something that could not be checked, or audited, or talked or written back to. It is, at most, an auxiliary of the newspaper—Ottawa Journal.

There are some men born with the idea that it is their job to grease the axle of the world and keep it in running order, but somehow when they depart there is not the slightest quiver nor setback in the progress of the town.—Chatham News.

The Man Who Does A Town More Harm Than Good

The men who do a town more harm than good are those who oppose improvements; run it down to distract public-spirited men; show no hospitality to anyone; hate to see others make money; oppose every movement that does not originate with themselves; acquire long faces when a person speaks of locating in their town; oppose every public enterprise which does not appear to personally benefit themselfs.

There are some men born with the idea that it is their job to grease the axle of the world and keep it in running order, but somehow when they depart there is not the slightest quiver nor setback in the progress of the town.—Chatham News.

Standard Design

Canadian National Type Adopted For All Canadian Hospital Cars

Advice has been received from Ottawa that the design of the Canadian National hospital cars, which was recently placed in service, has been adopted as standard for all future Canadian hospital cars. It was announced at headquarters of the Canadian National Railways, Montreal.

Two additional air-conditioned hospital cars of the standard type are to be built in the Montreal shops of the National system, the announcement stated. The interior layout of the fourth C.N.R. car was designed by Col. E. L. Stone, Ottawa medical adviser in the directorate of movements, in co-operation with medical and car experts of the National system.

Factory Made Homes

New Type Of Dwelling Is Being Tried Out In Yorkshire

A contracting and prefabricating organization in Hull, Yorkshire, which has throughout the war suffered continual and heavy bombing, has constructed two factory produced dwellings of a new type in record time. One is a three bedroom, two-story house which is entirely factory built in wooden framed concrete wall units and was assembled on the site in four days. The other is a cottage comprising living room, bedroom, kitchenette and bathroom which was set up in six hours while the public watched its construction. The work was done by eight men and four boys.

The walls, floor, chimney and roof were in position in one hour. All timber and joinery used is kiln-dried. The walls have the same heat insulating value as an eleven-inch cavity wall. The internal fittings are calculated to make housework easier and there is a utility room in the two-story house which houses a washing boiler and has room for a piano and a bicycle. The construction of the two-story house works out at \$3,000.

PROTECTS ITSELF

The Rock of Gibraltar produces its own smoke screen. It deflects warm air, causing it to rise to higher levels, where it cools and forms clouds. As "the plume" hangs over "The Rock" much of the time.

Later, when he reached into his breast pocket for the wedding ring, the telegram crackled and reminded him he would soon be China-bound by clipper. Some day, when it could no longer matter, Karen would learn that to Emily, noble but fiftyish, David Prescott had just been a case with a splintered leg, an anonymous cot in a London nursing home.

LOCAL & GENERAL

Mrs. Doug Sterling (nee Bunn Tighe), of Chilliwack, B.C., is renewing acquaintances in town.

Mrs. F. Lawrence of Provost, spent Friday with Miss Hazel Hamilton.

Miss Evelyn Kaufman, of Calgary, spent the weekend here with her father.

Miss Dionne Geiger of Calgary, spent the weekend at her home here.

Remember the Anniversary Dance at Melvin Hall on Friday, August 4, with H. Gardiner's orchestra.

Mrs. Mary Rodney has returned to her home, after being a patient in the hospital here, and patients feeling much better.

Miss Shirley Liesemer is spending her summer vacation with Mr. and Mrs. A. W. Reiber at Banff.

There's to be a Model T race in Olds on Saturday, August 12, Didsbury is to be represented, we hear.

K. A. Cassidy returned Sunday from a short holiday spent at Flin Flon, Manitoba. Mr. Cassidy did not make the trip by plane.

Mr. and Mrs. George Law are on vacation, and brother Jack is taking charge of the Drug Store during their absence.

Mrs. Rodney wishes to thank the Spring-side Sunday School group for the lovely flowers sent to her while in the hospital.

Miss Dora Fawcett returned Monday evening, after spending two weeks vacation at Waterton Lakes with her parents, Dr. and Mrs. Fawcett, and Reta Mae.

Miss Wynne Moon returned to Calgary on Sunday to resume her nursing duties at the Holy Cross Hospital, after a three week holiday spent in town and district.

ACI B. R. Blough, of Pearce along with his wife and family of Calgary, are visiting at the home of the latter's parents, Mr. and Mrs. H. J. Wall.

LAC Fred Evans of the R.C.A.F., who has been spending his furlough at his station at Bella, B.C.

Mr. Ed Janz, who has been working at Edmonton for the past year, returned home last week, and will be here in future.

Mr. Lee Sanderman left on Monday for Vancouver, where he will visit Mr. and Mrs. Culling, and incidentally look for a new location.

Lc. Cpl. Warren Matheson, who is with the Army Medical Corps at Camp Borden, Ont., who has been spending his furlough at his home here the past week, returns Friday.

Mr. and Mrs. D. Sinclair drove to Sylvan Lake last Thursday, taking their daughter, Irene, and the Misses Edna Roberts, June and Eileen Parsons, to C.G.L.T. Camp at Kasota Beach.

The dance which was to be held at the Rugby Hall on July 7, has been postponed until August 11, that being the anniversary of the opening of the Hall. "Melody Five" will supply the music.

The annual meeting of the W.C.T.U. will take place at the home of Miss Cressman, on Thursday, August 10, at 8:30 p.m. Reports of year's work will be received. A special request that all members be present.

Remember the C.C.F. public meetings, at Mountain View Hall on Friday, August 4, at 8:15 p.m., and at the Rugby Hall on Monday, August 7th, at 8:15 p.m. Speakers, R. C. Bell, C.C.F. Candidate, and Mrs. Laura Jamieson, M.L.A., of Vancouver, B.C.

Liesemer reports a somewhat unusual performance with his herd of registered Holstein cows. He has six head of pure-bred cows and this season they have produced him 8 head of heifer calves which included two sets of twins.

LOCAL & GENERAL

Miss Winnie Adshead, of Ottawa, was calling on friends here on Tuesday.

There will be a Social Credit meeting at the Rugby Hall on Saturday, August 6, at 8:00 p.m. H. G. Hammel will be the speaker.

"True to Life," with Mary Martin, Franckton Tone, Dick Powell and Victor Moore, is the feature at the Didsbury Theatre this week.

Mr. E. Watkin of the Builders' Hardware, is on vacation, and he and Mrs. Watkin and daughter left on Sunday for a holiday at Sylvan Lake.

Mr. and Mrs. McFarquhar and the boys returned Tuesday from their holiday at Banff. They got as far as Calgary Monday, but couldn't make it home.

Fourteen of the members of the Didsbury Detachment of the 14th Regt. Calgary Tank (R), have been attending camp the last week, with Sgt. C. Marden in charge. They report that this is the best camp they have attended.

Dog Pound Notes

The West Dogwood branch of the U.P.A. held a meeting at the home of Mr. and Mrs. A. McLain on Wednesday evening. A large number of members and guests were present. Three new members joined, and with the four who joined at Rugby July 21st, the membership has risen to 47. The local wishes to thank the board of the Rugby Hall for the free use of it on the evening of July 21st, when Mr. M. G. Goss, of the Central Board, gave an address. This kindess is much appreciated.

The next meeting will be held at the home of Mr. and Mrs. Waldron Zeller, August 23rd. All members are urged to attend as well as any others who would like to join in. Any who are not far away and wish to locate their home will find Mr. A. G. Crotz, district sub-director, ready to give them any help necessary.

Evangelical Church Notes

Morning service on Sunday at 10:30, and Sunday School at 11:30. There will be no evening service. There will be no Sunday School at Jutland.

The Brotherhood will meet on Monday, August 7, at 8:00 p.m.

United Church Notes

Rev. and Mrs. D. Whyte Smith and Catherine left this week for a holiday at Sylvan Lake.

Mr. Smith is business manager for the United Church Camps at Kasota Beach.

The church services on the field will be discontinued till Sunday, August 27.
